

MOROCCO

Project No: 2017-MARTRADE-379

Project Title: The Feasibility Study on the Interoperability of Selected Single Window Systems in the OIC Region

Project Owner: Ministry of Foreign Trade of Morocco

Project Partners: Tunisia and Cameroon

Cooperation Area: Trade

Implementation Year: 2018

Project Purpose: In line with the trade facilitation output area of the COMCEC Strategy, the project aimed at analysing the interoperability of Single Window Systems in partner countries and retracting some lessons and recommendations for other OIC member countries. It also sought ways and means for simplifying trade procedures, eliminating arbitrary bureaucratic practices in trade transactions and increasing capacities of custom administrations.

Project Activities:

- Study visits to collect data for the research study
- Research report on the interoperability of single window systems among partner countries
- Validation meeting to discuss findings of the research report
