

IRAN

Project No: 2018-IRNTRANS-577

Project Title: Increasing Seaborne Transport and Trade within the Framework of the TPS-OIC

Project Owner: Ministry of Transport

Project Partners: Oman, Pakistan, Qatar and Turkey

Cooperation Area: Transport and Communications

Implementation Year: 2019

Project Purpose: The COMCEC Strategy states that interconnectivity and interoperability of transport sector is matter of concern due to missing links and divergent technical standards among the member countries and such problems increase the transportation costs, thereby erode competitiveness of member countries. Therefore, this project searches for practical solutions within the framework of the TPS-OIC to facilitate trade by decreasing international seaborne transportation costs.

Project Activities:

- Research Report on multimodal transportation chain in the OIC countries for analyzing the seaborne transportation and trade costs and proposing recommendations for the OIC countries to smooth flow of goods in line with the TPS-OIC.
