

The GAMBIA

Project No: 2024-GMBTRANS-345

Project Title: Strengthening Human and Institutional Capacity for Data Identification, Analysis, and Monitoring to Track Transport Sector Emissions in The Gambia and OIC Countries

Project Owner: Ministry of Transport and Communication

Project Partners: Senegal, Nigeria, Sierra Leone, Türkiye

Cooperation Area: Transport and Communication

Implementation Year: 2025

Project Purpose: The purpose of this project is to enhance human and institutional capacity in The Gambia and selected OIC countries for developing robust monitoring systems to track emissions in the transport sector.

Project Activities:

- The project comprises two main activities a study visits and a training session executed in a sequential manner. The study visit will occur first providing participants with firsthand practical insights into best practices for emissions monitoring systems focusing on technological institutional and legal frameworks. The training sessions will occur next building on the insights gained during the study visit these sessions will equip participants with the requisite skills and technical competencies.
